

# LOCKITNETWORK

MOTION PICTURE COMMUNICATIONS

The **LockitNetwork Production Service** saves hours each shooting day by combining on-set metadata workflows and timecode technology.

## HOW DOES OUR PRODUCTION SERVICE SAVE TIME?

### VERSATILE ON-SET METADATA COLLECTION

The script supervisor collects all content-related, technical and organizational information digitally with the LockitScript iPad app – LockitNetwork turns that data into digital daily reports and live statistics.

And: post-production files are available for straight import into your post production tool - instead of manual entry from paper.

TIME SAVING: 2H / DAY

### HIGHLY ACCURATE TIMECODE SYNCHRONISATION

The Ambient Lockit Timecode Boxes keep cameras and sound recorders on set in sync.

Why? Digital film clips from timecode synchronised cameras can be sorted with 1 click in any professional editing software - instead of manually looking for the clapper sticks in every single clip and moving it in the timeline.

TIME SAVING: 1H / CAMERA / DAY

---

EXAMPLE: At a 3 camera shoot you save **5 hours each shooting day!**

---

# BENEFITS OF OUR PRODUCTION SERVICE AT A GLANCE

## CUSTOMIZED DIGITAL REPORTS!

We will format reports (like Daily Progress Report) per your production company specifications. These reports are then automatically generated and accessible via the cloud-based LockitWebTools at any time in PDF format or editable Excel format.

## SAVE TIME IN POST-PRODUCTION!

Save hours of work every day thanks to timecode-synchronised film clips and digitally gathered on-set information.

## KEEP AN EYE ON YOUR SET!

Create reports live and keep track of what is happening on set.

## EASY SETUP

As part of our Production Service we combine the right parts of our Time-Savers to your production's requirements, customize the reports to your needs and get the different departments involved.

Contact us at +49 89 716 742 30 or [hello@lockitnetwork.com](mailto:hello@lockitnetwork.com). We are happy to answer any questions to help you determine if our Production Service will fit your production needs.
